1. Is there an update on the fountain in Old Towne?

Petersburg Facilities Maintenance Division has located a replacement fountain for the Old Towne Fountain. The fountain that was found with assistance from Tourism requires adjustments to the base and nozzle to ensure the fountain will remain stabilized and the water will shoot at a higher velocity. It took some time to find a fountain that would appropriately fit the site, match the Old Towne aesthetic, and included a base that it could rest on, above the water line.

Due to it being late in the winter season with cooler temperatures arriving, adjustments to the fountain will be made during the Winter and installation will take place in the Spring.
